A passionate and highly motivated fresh graduate with a strong ground in web development using React.js. I am familiar with Next.js, MongoDB, Firebase, Supabase and Typescript. I have recently done an internship at DICT, where I developed a Ticketing System, applying the newest trends in technologies to extend my knowledge and gain hands-on experience. Committed to lifelong learning and keeping updated about the latest in technology, I am ready to dedicate my experience to innovative projects.

Experience

Capstone Project Leader *2023*

- Completed an online course in mobile app development, gaining expertise in key technologies such as React Native and Firebase.
- Consistently met project deadlines by delivering detailed reports on time, ensuring clear communication and progress tracking within the team.
- Awarded Best in Capstone Research at university for outstanding project execution and innovative solutions in mobile app development.

DICT Intern *2024*

- Developed a comprehensive ticketing system using Next.js and Supabase, streamlining the process for users and administrators.
- Collaborated with cross-functional teams to gather requirements and ensure the system met user needs and technical specifications.
- Independently designed and implemented core features of the ticketing system, ensuring scalability and efficient performance.
- Successfully deployed the ticketing system, receiving positive feedback for its user-friendly interface and reliability.

Education

Senior High School *2013-2019*

- Ballesteros National High School
- General Academic Strand

College *2020-2024*

- University of Cagayan Valley
- Bachelor of Science in Information Technology

Skills

- Coding
- Time Management
- Problem-solving
- Communication Skill
- Creativity
- Security System
